Md Younus

Summary

Detail-oriented Technical Support Specialist with a strong focus on developer support and troubleshooting. Proven experience in resolving complex technical issues, optimizing work-flows, and enhancing user experience for development teams. Skilled in collaborating with cross-functional teams, providing effective solutions, and utilizing various development tools and technologies. Passionate about bridging the gap between technical support and software development to drive efficiency and innovation.

Experience

Genpact - Process Associate

Hyderabad, India

09/2023 - Current

- Developed a web application using Django, implementing features such as user authentication, data management, and RESTful APIs.
- Collaborated with a team to design and deploy a responsive web interface using HTML, CSS, and Java-script, enhancing user experience.
- Utilized Django ORM for database operations, optimizing queries to improve application performance.
- Conducted unit testing and debugging to ensure code quality and reliability, resulting in a 20% reduction in reported bugs.
- Participated in code reviews, contributing to team knowledge sharing and adhering to best coding practices.
- Documented project progress and technical specifications, improving project transparency and aiding future development efforts.
